

ABOLITION AT HOME.

We see that Mr. Adams has presented to Congress a petition from "citizens of North Carolina," protesting against the admission of Texas into the Union as a slave State. Does this not sound strange to Southern readers? It is not stated from what portion of our State this Abolition petition came but we suspect it came from a region in which we recently on our travels found a number of rank abolition papers in circulation. On our return from the recent Raleigh Convention we stopped at a house in Orange county, at which a Post Office is kept. The table was covered with papers—on examining which we found a large number of the "Free Labor Advocate and Anti-Slavery Chronicle," containing the most bitter slanders against Southern slaveholders—calling them "man-stealers," "hypocrites in religion," "enemies to humanity," &c. &c. Along with this incendiary paper, we found the *Rail Register*, *Hillsborough Recorder*, and *Fayetteville Observer*. On enquiring for a Democratic paper, we were informed that "no such thing is taken at this office." We obtained a copy of the Abolition paper, and now have it. It contains a letter from a Mr. Starbuck, of Guilford, in which he informs the Abolition editor that the anti-slavery, or abolition party and doctrines are rapidly on the increase in North Carolina, and that ere long they will form a third party strong enough to control the two parties in our State, and direct legislation as they please. The slanderous speeches of Frederick Douglass, in Ireland, Scotland, &c., are given at length. This fellow was a slave of Gov. Dudley of Wilmington in this State, and ran away some years since. He was pampered up and sent over to England by our abolitionists to slander southern slaveholders. In one of his speeches, he pretended to exhibit the chains and whips with which he said southern slaveholders were in the daily habit of torturing and lacerating their slaves, and said it was a daily practice to nail the ears of men and women to posts, and whip them hundreds of lashes at a time. Is there not a law to punish persons for circulating such papers in our State? Will the honest men of the Whig party hold communion with such vile spirits? Recollect, the *Raleigh Register*, *Fayetteville Observer*, *Free Labor Advocate* and *Anti-Slavery Chronicle*, and *Hillsborough Recorder*, are all found together—no such thing as a Democratic paper "is taken here." Birds of a feather flock together. We were also politely informed that there was not a Democrat in all that region of country. We observed by the address, that the person who took the identification paper, also took the *Register*. The identification of whiggery and abolition seems to be as perfect in the South as it is at the North.

Important if True.—A correspondent of the Philadelphia Chronicle says—Mr. Patton, of Petersburg, Virginia, has invented a machine for navigating the air, after years of incessant application and study. It is a balloon, and can move fifty or sixty miles an hour. Connected with it is a battery, from which he can discharge from one to ten thousand one ounce balls a minute. He has likewise brought to perfection a submarine battery, to go ten or twelve miles an hour, and with which, by means of a torpedo, he can blow up a hostile fleet in thirty minutes. He can carry despatches to and from Oregon in a hundred and twenty hours.—*Clipper*.

Office Seekers and their assailants.—Mr. Pettit, a member of Congress from Indiana, writes the following letter to the editor of the *Washington Union*: "There is one branch of our legislative government in which, I understand, there is a rule of secrecy. No more anti-American, anti-noble, and anti honest practice exists in any part of our institutions. Take a case: a man is nominated by the President for an office on the fullest and strongest possible recommendation; a laager or a scoundrel writes to a senator, or the Senate, a pack of lies to defeat his confirmation; neither the nominee nor his friends can be heard in his defence, or even see the charges; or learn who made them. The nomination is defeated. This is the worst of iniquities and of tyranny. Such a proceeding the people will one day, sooner or later abolish."

Riches and Poverty in Great Britain.—A writer in Blackwood's Magazine says the number of paupers in Great Britain is four millions, or a seventh part of the population of the empire. In Ireland 2,300,000, England 1,500,000, Scotland 200,000. Since 1815, the people of England have been taxed £200,000,000, or one thousand millions of dollars, for the relief of the poor.—There are 70,000 persons whose annual revenue is \$200,000,000, or \$2457 each, in England.

One oyster establishment in Baltimore, according to the Sun, has 25 men regularly employed in opening oysters for exportation. They sometimes open 500 gallons a day. They are put up in tin cans, in their own liquor, which are made air-tight, and hermetically sealed; they are warranted to keep fresh in any climate. Five men are kept constantly employed in making the cans. The oysters are sent principally to the Western States, but considerable quantities are sent to the West Indies, South America, and some have been even sent to China.—No returns have been received from the last named market, to inform us how the Celibates fared the shell fish.

The Great Railroad.—Whitney's Railroad is making a stir in Europe. A correspondent of the *Washington Union* writing from Bremen, says he has sent a copy of the gigantic scheme to a member of the German Diet, suggesting that it should be forwarded to the Emperor of Russia, through Count Nesselrode, with the view of inducing him to extend a railroad from Moscow to the confines of China. A railroad between Europe and Asia, and another this continent, would be as good as a Congress of Nations for the preservation of peace and the promotion of commerce in the human family.

An Editor in Office.—The editor of the Iowa Gazette offers for sale a part of his establishment, and gives notice of his withdrawal, also, from the editorial charge. He assigns, as a reason for this unusual step "The President of the United States having thought proper to appoint me to a high official station, it is proper, as well as necessary, that I should entirely disconnect myself with the Gazette press."

The office to which the editor, James Clark, Esq., has been called, is that of Governor of the Territory of Iowa. We wish him as much credit in the chair of State, as he has won in the editorial chair.

Good.—A few days ago, a gentleman looking over his tailor's account, observed a charge of seven shillings more on a coat than he had been accustomed to pay. On inquiring, the tailor informed him that he had been obliged to take up an additional quantity of cloth. "Why," exclaimed the gentleman, "it was scarcely half a year ago that you told me you managed to get a new coat for your little boy from what remained of the Cloth you made my coat from; I am not convinced I have not increased my size since that period." "No, sir," said the tailor, "you are much the same as usual, but my little boy is so surprisingly grown that you would scarcely know him."

Save your Corn Cobs and Shucks.

THE undersigned has obtained Letters Patent to enable common Millstones (or rocks) now in use, to grind CORN, COB and SHUCK, into meal, for Horses, Mules, Cows, Hogs, &c., thereby saving more than one third of a crop, which is an important item with planters. The machinery used for the above purpose is simple and durable, and cannot, with fair means, get out of order. It will last as long as the Stones last, with an expense of 50 cents every five years. To enable the common Mill Stone, to grind ear corn into meal, requires no new buildings or extra power. It can also be applied to Horse Mills, Threshing Machines, Grist, or any given power known. The same Mill will grind one-third more of Corn Meal by the introduction of this Machinery, and can be changed from grinding Corn and Cob, to grinding Corn Meal in the space of thirty seconds. Corn alone, when fed to stock, is said to be by the most practical and scientific Planters, constituting in its effects, producing founders, cholics and various other maladies which are incident to stock. Grinding cobs with the Corn, makes a food congenial with their nature, and cannot produce any of the serious results above mentioned. Stock, when fed on Corn exclusively, are deprived of the benefits of distension (so necessary to the proper health of animals), by their being unable to eat a sufficient bulk to produce distension before the animal becomes gorged. Cobs ground with the corn, produce the necessary distension, without any danger of diseases arising from overeating. Corn and cob meal is improved, by scalding, and still more by boiling, and yet more by a partial fermentation. All the preparations facilitate digestion for Hogs. But Horses and Mules will require it dry partially wet with cold water. Horses, Mules and Oxen, when fed with ground corn, yield much in an undigested state, which is of course lost for all beneficial purposes. Read the subjoined certificate. The undersigned can be addressed at Raleigh, and all calls will be attended to punctually and with despatch by himself for Agent. W. F. COLLINS. 26-1y. March 14, 1845.

CERTIFICATE. Having been solicited by Maj. Collins to have my Mill adjusted to grind Corn in the Ear and Shuck, I consented that he should so as an experiment; and I am able to say that it grinds Corn in the Shuck at the rate of 30 bushels per hour; and the dressing of the stones is so improved, that it grinds shelled Corn more than twice as fast as before, and by my watch, at the rate of 15 bushels per hour, and the meal finer than usual. I deem it a valuable improvement, and shall purchase the right to use it, as it will afford me a speedy way of feeding my horses and cattle, and save much thereby. W. M. BOYLAN. March 14, 1845.—[26-1y]

Valuable Plantation FOR SALE.

THE SUBSCRIBER, being desirous of removing to Florida, will sell his two PLANTATIONS on Little River, (S. C.), and the Sea Shore, four miles from the North Carolina line, and immediately on the Road leading from Georgetown to Wilmington. The one whereon he now lives, and West of Little River, contains about 4000 acres of land, 200 of which is cleared and under good fence. About 40 acres of this is Swamp, well drained, and with ordinary seasons will produce from 25 to 30 bushels of corn per acre, or 1000 to 1200 pounds of cotton. Adjoining this there are about 200 acres of uncleared Swamp of equal quality. On this tract, there is a good Dwelling-house, Kitchen, two Barns, new Cotton Gin, Negro-houses, Stables, and other out-buildings, all in good repair. About 8000 acres of this tract is PINE LAND, well adapted to Turpentine, convenient to the tide water of Little River, where Turpentine may be shipped at any season of the year that may suit the maker.

The other PLANTATION, adjoining, East of Little River, and on the Sea shore, contains about 700 acres of land, 150 acres cleared and under good fence, having on it a Dwelling-house, Kitchen, Barn, Stables and other out-buildings, and is one of the handsomest and most convenient places for a summer residence on the coast, the house being very near the beach, in open view of the ocean, & having the full influence of the sea breeze, convenient to Fish and Oysters, and all the productions of the salt water. It also affords one of the best locations for Seine Fishing.

Persons desirous of purchasing, will do well to come and see for themselves, as the subscriber will take pleasure in giving every information desired. Terms of sale made known on application, or by letter addressed to the subscriber at Little River, S. C. Reference is also given to Dr. Bellamy, in Wilmington, who is well acquainted with the above described property. JOS. VAUGHT. November 28th, 1845. 11-f
